

METHOD AND APPARATUS FOR STORING A MESSAGE FOR PLAYBACK  
DURING A USER-INITIATED EMERGENCY TELEPHONE CALL FROM A  
WIRELESS DEVICE

5

Abstract of the Disclosure

A wireless device such as a cellular phone is disclosed.  
The cellular phone is adapted to store a voice message  
10 picked-up by a microphone and store voice data representing  
the voice message in a memory. The cellular phone is  
further adapted to initiate a call such as an emergency 911  
call in response to a turbo-dial or speed-dial key stroke  
initiated by the user. The cellular phone transmits the  
15 stored voice message, along with position data obtained by  
an onboard geolocation receiver, when the call is  
established.
